

WINDSOR BERGEN ACADEMY

Behavior Management

Students can earn up to 100 points for each school day. They have the opportunity to earn up to 10 points for each period. Each point directly corresponds to the successful demonstration of the schoolwide behavioral expectations. These expectations are defined below:

1. Choose Respectful Words
2. Follow Staff Directions
3. Keep Hands, Feet, and Objects to Self
4. Focus on Self
5. Transition Appropriately
6. Use Appropriate Voice Level
7. Complete Assignment
8. Handle Materials Appropriately
9. Remain in Assigned Area
10. Be Prepared to Learn

It is the standard that students will strive to meet behavioral expectations all day, across settings. Therefore, up to five points can be earned during lunch and recess periods as well. Points are converted to “School Store Bucks,” which allow students to use what they have earned to “purchase” tangible rewards, including gift cards. Points also serve as a mechanism to collect data on student behavior. It determines students’ positioning on our level system, upon which privileges are based. It also allows clinicians to make data-driven decisions on student behavioral plans. At times, the data will indicate that the Tier 1 system is not adequately meeting the needs of individual students; in this case, clinicians will use the data to develop and implement Tier 2 (small group) or Tier 3 (individual) behavioral intervention plans, when necessary.

The second component of Windsor Bergen Academy’s behavior management system is Social Emotional Learning, known as SEL. Current research links both short and long-term positive outcomes to social emotional competencies acquired by students while they are in school. Longitudinal studies suggest social and emotional competence can increase the likelihood of positive outcomes across the lifespan; these include high school graduation, readiness for postsecondary education, career success, positive family and work relationships, improved mental health, reduced criminal behavior, and civic engagement (CASEL, 2013, 2015). To achieve this goal, our program integrates SEL into the token economy by providing students the opportunity to participate in engaging rewards and privileges. These activities are critical to the comprehensive education of the whole child; they promote self and social awareness and community building. They also support the development of pro-social behaviors such as kindness, empathy, responsibility, decision-making and teamwork. Evidence based SEL interventions

WINDSOR BERGEN ACADEMY

Behavior Management

synthesize with PBIS consistently, as they both construct opportunities for explicit teaching of positive behaviors, as well as providing behavioral practice and immediate feedback. Opportunities for social emotional learning are naturally embedded throughout programming at Windsor Bergen Academy; they are present through delivery of Core Curriculum Standards, behavior management interventions, and school sponsored events that foster a positive climate within the school community. These activities are critical in helping students attain competency in the social emotional domain of self-management. Through planned learning opportunities such as field trips and holiday celebrations, students develop the ability to regulate their own affect, thoughts, and behaviors in different settings and situations. Using gift cards as a reward is another SEL tool used by the school to promote positive behavior. It also provides students the opportunity to become sound consumers who evaluate spending choices, learning budgeting skills, and exercise impulse control (Bridgeland, Bruce, Hariharan, 2013). The activities and privileges described below allow for “in the moment” modeling and reinforcement of skills taught through the delivery of formal and anecdotal SEL lessons in the classrooms. Over time, it is anticipated that students will be successful in universalizing adaptive behavioral skills in community settings.

Levels

Points are calculated weekly to determine which of three levels a student will be placed on. Each level affords the students a greater degree of privilege. Levels are reviewed every week. A student may drop a level if their percentage falls below the required amount specified to maintain that specific level.

Please note: Student levels can jump from Level I to Level III within a review period or drop from Level III to Level I in the same period.

ALL STUDENTS WILL BEGIN ON LEVEL III. Students must maintain 90% of their points in a review period to remain on Level III. Students earning 80-89% would move to Level II. Student’s earning 79% or lower would move to Level I. Students will remain on the level earned until the next level review.

Level Formula

$$\text{Percentage of points earned} = \frac{\text{total points earned}}{\text{total possible points}}$$

*Please note: If a student is absent, do not include possible points for the day of absence into the total possible earned figure. Percentages are calculated on days that students are present to earn ONLY.

WINDSOR BERGEN ACADEMY

Behavior Management

Definition of Levels

Level I Students who have earned 79% or less of their possible points that week.

No earned privileges allowed

Level II Students who have earned 80-89% of their total possible points that week.

Privilege is:

- Bi-weekly ice cream parties

Level III Students who have earned 90% or more of their total possible points that week.

Privileges are:

- All Level II privileges continue
- Bi-weekly pizza parties
- Field Trips, Community Service, Athletics, Special Activities and more
- Special Events and Tournaments
- Broadway Trips
- Student of the Month and Pillar of Character luncheon
- Weekly Level III Social Skills Activities

Students become eligible for field trips by maintaining an average of 90% or more for the designated earning period, typically 6 weeks.

All students may participate in the Annual Behavioral Auction and Field Day festival. All students may also participate in birthday, holiday and graduation celebrations, Welcome Back Breakfast, and contest rewards. All students are eligible to receive school spirit giveaways. Individual students may be eligible to earn rewards as part of an individualized behavior management plan.

New Students

When a new student enters school during an evaluation period, the points he/she earns during that time can only be used at the school store, they do not determine a student's level. The student must be in school for a full week after the initial evaluation period in order to change or maintain his/her level.

Behavior Management

Recess

There will be three student recess periods throughout the day. The student can earn 5 points for morning recess, 5 points for lunch time/recess and 5 points for afternoon recess. To participate in morning or afternoon recess a student must earn 80% of the possible points for the preceding periods. *Example: A possible 40 total points can be earned in the periods prior to morning recess. A student must earn at least 32 of the 40 points.*

If a student does not earn morning or afternoon recess, they must remain seated in the classroom.

Recess Evaluation Points

First Lunch

Morning Recess (10 minutes) – 32/40 Points

Lunch Recess (20 minutes) – All students participate in recess

Afternoon Recess (10 minutes) – 28/35 Points

Second Lunch

Morning Recess (10 minutes) – 32/40 Points

Lunch Recess (20 minutes) – All students participate in recess

Afternoon Recess (10 minutes) – 20/25 Points

Homework Points

Students may earn up to 5 points for the completion of their assigned homework.

Bonus Points

Bonus points can only be earned as school store points and do not count in level calculations. Bonus points are to be awarded only by certified or administrative staff. See administrative staff if you feel a student has exhibited behavior that merits additional bonus points. Bonus points awarded should not exceed more than 10 points per day; discretion should be used that bonus points are being used as a tool to provide immediate feedback for desired behaviors that surpass the school-wide expectations, or are specifically aligned with a student's individual behavioral goal.

School Store

Students may redeem their points on a weekly basis at the school store. Teachers can send students in small groups (4 at a time) with an instructional paraprofessional at their

WINDSOR BERGEN ACADEMY

Behavior Management

assigned time. Students may bank their points for a future purchase. However, their points must be redeemed by the end of each academic year.

Documentation

While the recording and tabulating of behavioral points serves to inform students of placement on the level system, it is also significant to us as educators. These points serve as valuable data that can assist us in making informed plans for students that help them achieve their goals. Through analysis of behavioral data, educators and clinicians can make determinations about the effectiveness of behavior management interventions, and at times, suggest that a more individualized or intensive intervention plan should be developed to support positive behavior.

Windsor Bergen Academy maintains documentation of every student's daily point totals. These totals are transferred to electronic spreadsheets that tally weekly points earned for "School Store Bucks" and level review calculations. Weekly level sheets are also maintained in the classroom and a copy given to the Principal and School Social Worker at the end of each week. Teachers should establish a routine practice of reviewing student behavioral data weekly. Any significant changes in behavior should be brought to the attention of the School Social Worker.

Student level status must be posted in the classroom and updated weekly to reflect any changes. Teachers should also keep a chart of the student's levels throughout the year.
